I just get endlessly frustrated with this debate about terminology... the fight should be about... the discrimination rather than the terminology

Wayne Farah (2023)

Background & Aims

LGBT+ people experience increased disease burden and significant health inequalities (Blondeel et al., 2016; Government Equalities Office, 2018; NHS Digital, 2021)

Stigma and discrimination identified across a large number of settings within multiple LGBT+ groups (Ayhan et al., 2020).

(Connors *et al.*, 2020)

Background & Aims

Substantial gaps from an intersectional and local perspective led to aims of:

Methods

Design and setting:

Qualitative, semi-structured interview, including demographic data.

Sample and recruitment:

n=62 (30 LGBT, 32 PROF), 59.5 hours. Purposive/snowball sampling.

Analysis:

Two discrete, iterative streams. Cross-tabulation in NVivo.

I approached the desk and asked them to put up a poster advertising a new LGBT support and social group. And I was told "oh, but this is a family surgery, we can't display anything like that" (PR24)

But then I got into an abusive relationship with a woman.... she was hitting me... and they (the police) never treat it as DV, just as somebody hitting somebody else.'(LG11)
